

SYDNEY FOOTBALL STADIUM REDEVELOPMENT

OCCUPATIONAL HYGIENIST

EP Risk was engaged by John Holland Group on behalf of Infrastructure NSW to conduct Occupational Hygiene services for the Sydney Football Stadium Redevelopment

Infrastructure NSW oversaw the design and delivery process on behalf NSW Government. John Holland Group was engaged to deliver the stadium and appointed EP Risk as the Occupational Hygienist and Environmental Consultant for the works.

A Remediation Action Plan (RAP) had been prepared for the Site which included capping of existing asbestos in soils. The occupational hygiene scope included hygienist advice and support for Respirable Crystalline Silica (RCS), mould, dust and COVID-19.

PROJECT OUTCOME

EP Risk liaised with SafeWork NSW, Infrastructure NSW, the NSW EPA Accredited Site Auditor, Comcare and Trade Union delegates throughout the project on behalf of JHG. The occupational services were provided in a timely manner to avoid delays throughout the project.

SERVICES PROVIDED

- Asbestos awareness training for all workers.
- RCS awareness training.
- Toolbox talks (asbestos/RCS).
- Daily asbestos air monitoring.
- Task specific RCS air monitoring and risk assessment.
- Indoor Air Quality Assessment for restricted spaces.
- Air and surface microbial sampling.
- Remedial advice and post mould remediation verification.
- Waste Classification.
- ASBINS validation sampling.
- Review of Occupational Hygiene and COVID-19 management plans.
- COVID-19 cleaning and disinfection works supervision and verification
